

Memorandum of Understanding
between the
International Society for Photogrammetry and Remote Sensing and the
Open Source Geospatial Foundation
July 20, 2016

The purpose of this Memorandum of Understanding (MOU) is to establish a collaborative relationship between the International Society for Photogrammetry and Remote Sensing (ISPRS) and the Open Source Geospatial Foundation (OSGeo). Both parties to this MOU share the goal of helping share global geo-information with all communities.

The MOU will cover the following proposals and topics:

- To formally bridge the photogrammetry, remote sensing and spatial information science communities with the Open Source geospatial community.
- To promote the distribution and use of open geo-data sets in all communities.
- To promote the development of related photogrammetry, remote sensing and spatial information Open Source software.
- To work closely with the Geo for All initiative, to help promote openness in education and research.
- To hold joint international workshops and conference sessions on open geo-data sets and Open Source photogrammetry, remote sensing and spatial software.

This MOU will be reviewed biennially by both parties at which time revisions may be made and the agreement renewed.

Christian Heipke
President
International Society for Photogrammetry
and Remote Sensing

Helena Mitsova
Vice-President
Open Source Geospatial Foundation
